

Segunda Conferência Técnica Internacional da SGfA

WORKSHOP # 4 – Programme proposal**“Contribution of geophysics to humanitarian demining : to assume our social responsibility”**

Programa	Oradores	Session moderators	COMENTÁRIOS
1st Session Thursday 25/11 morning	1. Opening	André Santana Pitra (presidente of CNIDAH)	António Jerónimo (UAN, SGfA)
	2. talk: State of the demining task in the country	Leonardo Sapalo (director of INAD)	Teresinha Gaspar (LEA, SGfA)
	3. talk: Overview of the technology used for demining today in the world	WHO ? (XXX)	
	4. talk: Geophysical methods used for demining	WHO ? (XXX)	
	5. talk: The use of GPR in Angola: the experience of Agostinho Neto University	José Pérez lazo (UAN, SGfA)	
2nd Session Thursday 25/11 afternoon	6. talk: Result of a test: - application of GPR to the landmines test field near Luanda (Viana)	Stefan Schultheiss (TRICON)	José Pérez Lazo (UAN, SGfA)
	7. debate: Applicability of geophysical methods to the demining undertaking in Angola: – technical issues – logistical issues – organizational issues – human resources issues	debate of moderators: Leonardo Sapalo (INAD) Balbina da Silva (CNIDAH, directora) Mateus M. Neto (Ministério da Ciência e Tecnologia) Miguel Gago (INEA, SGfA) José Pérez Lazo (UAN, Geofísica)	
	8. Closing	Pedro Teta (vice ministro Ciência e Tecnologia)	
			As the topest level responsible in Angola for demining structures (15') (20') (20") (20') this talk might also give an overview of the institutions (academic & research) in the worlds that do work using geophysics for demining... (20')
			(30')
			A debate around a proposal presented by the Agostinho Neto University.
			As the most recognized government authority for Science and Technology issues (15')
